

New products at Arab Health 2010 - Zabeel Hall / Booth ZD 59

Full body UV therapy system

UV 7002 - SAFETY 1st

Use it as a reliable aid in:
- Dermatology

The new UV 7002 can additionally be controlled via computer with the Dermamate software. This provides comprehensive safety and efficient comfort with the management of patient data and treatment regimens.

Advantages

- New generation of lamps measuring 2 meters in length. As a result, full-body radiation has been perfected
- reddot design award winner
- Easy-to-operate high-resolution touch screen TFT monitor
- In practical application, this new, sensor-supported controller offers perfect dosimetry and a logic user interface

LED treatment light

D^{med}® saturn LED

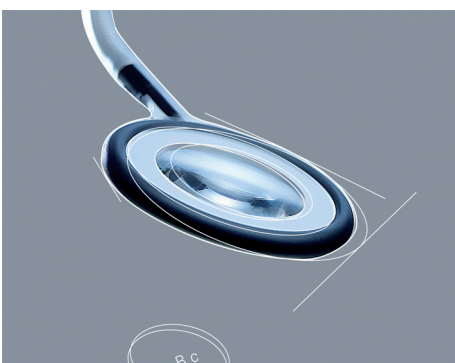

Use it as a reliable aid in:
- General medicine
- Dermatology
- Gynaecology

Virtually no heat radiation in the light helps improve the physicians concentration skills while the dehydration of tissues is also reduced to the minimum.

Advantages

- Round, smooth design
- Dimmable light intensity
- Adjustable size of light field
- 3 colour shades
- Free of maintenance due to LED technology

Magnifyer lamp

RING LED RLLQ 6

Use it as a reliable aid
- for seniors as reading aid
- in general medicine
- in dermatology

The RING LED is made of sturdy metal. The closed lamp head allows a simple and quick cleaning. LEDs ensure a long lifespan.

Advantages

- Gentle on the eye:
Glare and distortion-free
- No down drift of the magnifying glass
- Plenty of light – low power consumption
- Many fastening methods
- On/Off - by gentle touch
