WALDMANN – PARTNER TO PROFESSIONAL PLANNERS

OFFICE

HEALTH & CARE

INDUSTRY

Waldmann is your partner for lighting and for planning lighting in offices, in industry and the health & care sector. With our comprehensive range of products and our innovative and easy-to-grasp solutions in terms of installation and of application, Waldmann is able to provide answers to any questions and requirements the electrical planning specialists may have.

YOU ARE LOOKING FOR LIGHTING
SOLUTIONS. EVERYTHING POINTS TO
YOUR FINDING THEM AT WALDMANN

Professional light planning requires a commensurate partner. Waldmann stands for high quality light solutions designed to fulfil human needs. We develop and produce our luminaires and lighting systems in-house with exceptional manufacturing depth. We are able to do this because of more than six decades of experience and our extensive expertise in mechanical and electronic systems. Some 940 committed employees contribute to the success of Waldmann at the company's headquarters in Villingen-Schwenningen and production and at distribution locations in 12 countries worldwide. With our global support capability, we can assist you in implementing your lighting projects optimally.

YOUR SUCCESS FACTORS FOR OPTIMUM LIGHTING PLANNING:

BRAND

LIGHTING FOR HUMAN BEINGS

- Development of lighting solutions with a focus on human needs
 - Comprehensive portfolio of products for planning high-quality lighting solutions in industry, office premises, and the health & care sector
 - Decades of experience in workplace lighting, starting with lighting for watchmakers back in the 60s
 - User-oriented solutions based on knowledge from science, the humanities and from practice
 - Waldmann is a pioneer in the field of workplace solutions, e.g. the first ever free-standing luminaire with indirect, biodynamic light
-

RELIABLE PARTNER

- Great product quality, professional advice, comprehensive range of services
- Waldmann lighting consultants, available wherever you are and at every phase of a project
- Comprehensive product information printed or online
- Simple access to light technology data, texts for tenders, CAD and graphic data etc. – all to make your work easier
- Straightforward provision of sample luminaires
- Total reliability in relation to products, verbal commitments and services

LIGHT

COMPREHENSIVE, INTELLIGENT RANGE

- Comprehensive, clearly structured range
- Holistic lighting concepts, specific to rooms or workplaces
- Luminaires with direct and indirect light component for particularly high lighting quality
- Broad spectrum of luminaires with biodynamic light
- Appropriate solutions for different project requirements (light quality, energy efficiency, costs), commitments and services

FULL-SPECTRUM DESIGN

- The general design claim of Waldmann is to obtain maximum functionality with minimalist design
- Timeless and sustainable products, highly prized by architects, interior designers and users – winners of multiple design awards
- Luminaires as members of complete design families, perfectly adaptable to suit all needs
- Design of different application ranges in a transparent design

TECHNOLOGY

PROPRIETARY LIGHT MANAGEMENT SYSTEMS

- Since 1999 luminaires with self-developed daylight sensors and presence sensors
- Comprehensive know-how in lighting management, ranging from intelligent networking of lighting inside buildings, an understanding of users and of other luminaires, to time-controlled use of biodynamic lighting
- Permanent improvements and further developments, to reduce energy consumption and to increase user comfort
- Project-specific and individual adaptations are possible

QUALITY "MADE IN GERMANY"

- State-of-the-art technology, timeless modern design and long-lasting quality to 'made in Germany' standards on all products
- Use of high-quality materials and careful processing are the key to a long service life and a high level of practical usage
- Outstanding energy efficiency, all new developments designed for at least 100lm/W
- Great price-performance ratio ensures an appropriate solution for every project budget

SERVICE

EASY INSTALLATION AND OPERATION

- Whenever possible, supplied in ready-to-connect condition
- Simple and safe product selection, fast and problem-free installation with simple wiring
- Time saving and stress avoidance on the building site
- Catalogue and homepage: Simple design of all product information for rapid location, identification, project planning and ordering
- Waldmann products are usually easy to specify, plan for and include in tenders

ADDED VALUE THROUGH PLANNING EXPERTISE

- Planners benefit from Waldmann through the additional specialist expertise and competitiveness it can bring to bear
- Dialogue with a pioneer in the sector, for example in relation to biodynamic lighting
- Support right from the planning phase with intelligent concepts and appropriate products
- Holistic solution, tailored to suit the requirements of each project for your customers
- Simplification of work through helpful tools such as an online lighting calculator, comprehensive product data and exemplary lighting calculations

Holistic solutions for the office

For modern office and administration buildings, Waldmann can provide holistic solutions for workplace-related and room-specific lighting. Families of luminaires based on a common design concept enable customers to create an atmospheric overall impression within each room. All these luminaires are easy to install and operate – and have proven to be remarkably energy-efficient in networking scenarios involving lighting, users and buildings. In combination with the PULSE VTL biodynamic light management system, this produces high-quality lighting, matched to the needs of human beings.

WALDMANN
LIGHTING SOLUTIONS FOR
THE MODERN OFFICE

LAVIGO

THE FAMILY OF LUMINAIRES
THAT COMBINES CLEAR,
MINIMALIST SHAPING WITH
INNOVATIVE TECHNOLOGY

The simple designs are the ones that outlive all trends and will still be valid tomorrow. This is why the design of the LAVIGO family of luminaires uses the rectangle as its hallmark feature. The clear, minimalist design makes LAVIGO luminaires compatible with a wide variety of furniture systems, rendering it ideal for use in the modern office. There are many different performance classes and designs of

the LAVIGO free-standing luminaire, for example those with a T or U connection for serving up to four work-places. There is also a choice between two performance classes of the LAVIGO suspended luminaire and two length variants, to satisfy different planning and workplace requirements. All luminaires can also be supplied with biodynamic light.

IDOO

THE EFFICIENT RANGE OF LUMINAIRES WITH FLOATING LENS AND DIRECT/INDIRECT LIGHTING

The hallmark feature of the IDOO family of luminaires is its lightweight almost floating lens – a common feature of all models.

Thanks to state-of-the-art edgelight technology, the direct light component of the IDOO.pendant suspended luminaire provides particularly uniform lighting. Unlike most luminaires of its kind, the IDOO.line suspended luminaire offers not only direct but also indirect light.

Even the IDOO.fit surface-mounted luminaire has a frame that seems to float just below the ceiling. This impression is created because the ceiling and the walls are brightened with indirect light using a specifically designed lens. All of these luminaires are also available in the PULSE VTL version for biodynamic light.

DOTOO THE RECESSED LUMINAIRES FOR SUPPLEMENTARY DIRECT LIGHT

For supplementary light at the workplace and on foot traffic routes such as hallways and corridors, you can count on the DOTOO family of recessed luminaires. The LED downlight DOTOO.spot is the ideal supplement to room depths in conjunction with other luminaires such as free-standing luminaires. This luminaire, which can be used as emergency lighting, is suitable for ceiling installation in ceiling tiles of 0.8 to 42 mm, and no tools are

required. The hallmark feature of the DOTOO.fit LED recessed luminaire is its particularly flat design. The use of edge-light and light-guide technology produces uniform and homogenous direct lighting to provide efficient room lighting. Ceiling integration ensured on the basis of national and international standards.

PARA.MI

THE TASK LUMINAIRE FOR MAXIMUM INDIVIDUALITY IN THE OFFICE

PARA.MI sets new standards in terms of individuality. This task luminaire can combine single elements and colours to create one individual whole to suit your personal tastes. Round or angled luminaire head, single or double-armed column, round or angled base and/or connection possibility to a furniture system, all combined with high-quality surfaces.

The characteristic joints set a particular accent: Maintenance-free and self-locking, these joints provide a maximum number of adjustment options. A bright LED module creates homogeneous, wide-angle workplace lighting. Glare from the neutral light is prevented by a specially developed reflector. With installed power consumption of just 8 W PARA.MI is remarkably energy-efficient.

Good light for improved well-being

Especially in the health & care business light has a significant influence on our sense of well-being. In clinics and rehabilitation centres, light can assist in the healing process. In homes for senior citizens, good lighting can provide guidance and safety, while also making it easier for doctors and care personnel to do their work. It is therefore a special kind of challenge to develop professional lighting concepts for these sectors. Waldmann meets these requirements with functional, comfortable, needs-based and people-friendly solutions, especially in combination with the PULSE VTL biodynamic lighting management system.

WALDMANN
LIGHTING SOLUTIONS
FOR HEALTH & CARE

ZERA BED

THE INTELLIGENT BED WALL-MOUNTED LUMINAIRE FOR IN-PATIENT ROOMS AND CARE ROOMS

The design of the new LED wall-mounted luminaire ZERA BED is as clear, straight and simple as its name. ZERA BED is impressive because of its slim, restrained shape, and the way its modularity and technical finesse enhance its functionality – maximum light quality, individually or in combination with switchable lighting scenarios and a USB network gate. Due to its versatility as an examination light, general

light, reading or night light, ZERA BED is the perfect solution for in-patient or care rooms. Equipped with the PULSE VTL system, ZERA BED provides biodynamic light for a natural sense of well-being. Versatile functionality that elevates the ZERA BED to the Smart Light among wall-mounted luminaires.

VIVAA

SUSPENDED LUMINAIRES FOR GLARE-FREE, PLEASANT LIGHT IN PUBLIC AREAS

Timeless, lightweight, floating: This is the impact of VIVAA, a luminaire that fills public areas with living light. This combination of premium LEDs and light-enhancing microprism cover creates a glare-free and homogeneous light. Equipped with biodynamic light, VIVAA creates an atmosphere of well-being. It fits any room environment in a harmonious manner. Whether with seamless luminaire bodies made of

brushed stainless steel or cosy lampshades, VIVAA sheds a pleasant bright light into the room. The luminaire is suitable for any room height. Thanks to the customisable suspension length, it is ideal even for certain kinds of sloping ceilings. By virtue of its exceptional illumination effect, VIVAA is also a true pioneer in terms of cost effectiveness.

VANERA

THE VERSATILE FAMILY OF LUMINAIRES FOR HALLWAYS AND STAIRS

VANERA stands for a complete family of luminaires, suitable for all areas. Whether on wall or ceiling: Its different design and equipment variants can be adapted to suit every spatial requirement. High-quality materials, flowing material transitions and a linear, timeless set of design lines set new standards in terms of individuality and quality. Exceptional engineering prowess underpins this sleek design.

The specially developed plastic prism profiles direct the light in such a way that it illuminates rooms in a homogeneous and soft way. At the same time, this lighting casts no reflections or glare, and only minimal shadows. In its PULSE VTL version, VANERA luminaires emit natural and biodynamic light.

WALDMANN
LIGHTING SOLUTIONS
FOR INDUSTRY

Lighting solutions for the entire room

Waldmann's equally broad and deep product range covers all light requirements of an industrial company: From rooms to workplaces and machines, an entire industrial company can be equipped with Waldmann products, according to task and environment. These sophisticated individual lighting solutions support people at work and enable a sustainable and careful use of energy. If you so wish, we can accompany you throughout the entire process: from consultancy to planning and installation of the lighting system.

ACANEO

THE ROBUST HIGH BAY LUMINAIRE FOR PRODUCTION HALLS AND LOGISTICS BUILDINGS

Due to its suitability for production halls and in particular for logistics buildings up to 30 metres in height, the ACANEO high bay luminaire is extremely bright and efficient. Thanks to its unique housing concept, the robust ACANEO luminaire can also be used under extreme environmental conditions such as high ambient temperatures and oil-containing air.

Optimised lighting technology ensures homogeneous illumination of halls with exceptionally low levels of glare. This unusually lightweight high bay luminaire is available in three performance classes, three light colours, and switchable and dimmable variants.

TAUREO

THE FLEXIBLE CONTINUOUS- ROW SYSTEM FOR PRODUCTION HALLS

With its TAUREO LED continuous-row system, Waldmann is defining new ways of lighting production halls. As a modular system, TAUREO delivers appropriate lighting for a range of different requirements, such as those found, for example, in manufacturing premises, logistics buildings, warehouses or cooling facilities. Once installed, this system can be changed at any time.

If the original requirements are altered by changing workplace configurations and conditions of use, TAUREO can always be adapted without any problem to suit those new requirements. All this requires is for the lighting modules to be relocated – no tools required – or for additional ones to be installed. All accessory components such as daylight sensors and presence sensors or emergency lighting can be integrated into the system without any problem.
