

## **PRESS RELEASE**

Villingen-Schwenningen, 30.06.2020:

### **CONVEO continuous-row system**

Highly economical lighting system for factory halls by Waldmann

**Waldmann's CONVEO continuous-row system for production, warehouse and dispatch areas on industrial premises focuses on economy: quick planning, inexpensive implementation, easy installation and - of course - highly efficient lighting technology.**

The sophisticated combination of mounting rail, device carrier and fastener makes CONVEO the perfect Plug and Light solution. Tool-free intuitive installation with automatic forced contacting for instant earthing.

The variable device carrier spacing provides an almost endless range of planning options, supported by an open bus bar profile, the varied lighting technology and a comprehensive range of accessories. The smart bus bar profile and the well-designed connection technology guarantee proper functioning and the optimum light for any continuous-row system length.

The specially developed lens optic with a UGR of less than 22 and various luminous flux classes guarantee even, low-glare lighting with no light/dark zones in the most diverse spatial conditions. For error-free work and a high degree of visual comfort. The use of device carriers with a DALI operating device offers further options for the right level of illumination at the right time and to suit the activity. They facilitate continuous dimming, virtual room arrangements and the integration of daylight and presence sensors.

Durable materials ensure maintenance freedom, while the latest LED technology ensures big savings in CO<sub>2</sub> emissions and increases efficiency. CONVEO also includes options for biodynamic lighting.

**B1\_ CONVEO**, the economical continuous-row system for production, warehouse and dispatch areas.

**B2\_ The CONVEO system:** mounting rail, fully pre-installed device carrier with integrated seals and attachment.

**B3\_ CONVEO** is fitted with an intelligent bus bar profile that guarantees easy, quick and safe operation.

## **Waldmann – Engineers of Light**

Anyone based in the Black Forest must shine very brightly indeed. Today, the fourth generation of the Waldmann family develops lighting solutions that provide people with the optimum support whatever they are doing, whether in the office, on machinery, in industrial workplaces or working in healthcare. The "Engineers of Light" are constantly re-thinking light. For over ten years, Waldmann's biodynamic luminaires (Human Centric Lighting) have been providing people who spend a lot of time working indoors with the positive effects of natural light. With its digital solutions, the lighting experts are able to get the most out of the floor space and the company's staff and increase safety in healthcare.
